TOP STAR™ Adjustable Shim Screws

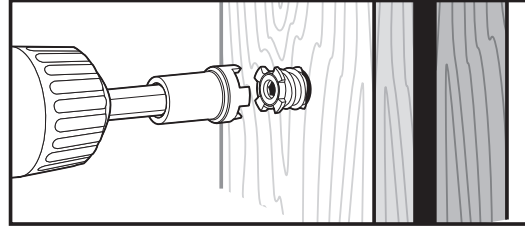

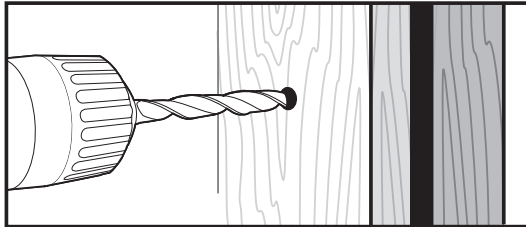

GRK's adjustable Top Star™ Shim Screw, is in fact a screw within a screw that allows you to install wooden doors or windows without the use of shims. The quick and easy system reduces labor and allows for hassle free adjustments to ensure plumb installation. Suited to meet the needs of both professional contractors and DIYers making the job easier for one person. Fine adjustments are as simple as the turn of a screw, even after years of use and settling.
